

## **Environmental Policy**

Croft Structural Engineering Ltd is committed to leading the industry in minimising the impact of its activities on the environment. The Company aims to protect and improve the environment through good management and by adopting best practice wherever possible. This encompasses not only the Company's internal practices and procedures but also the services it offers to clients.

The practice is working with Local Environment Agency ENVIBE. In 2010 the Company was awarded a Bronze Certificate and is currently working with ENVIBE towards a Silver Award and to realise its objectives:

- We are committed to recycling and reuse, as opposed to disposal, where feasible.
- We are recording the Company's annual energy consumption with a view to making significant reductions.
- We are committed to using sustainable resources when procuring equipment, goods, materials and services for the company.
- We will endeavour to bring relevant environmental issues to our clients' attention in all aspects of our activities.
- We will communicate the aims and targets of the environmental policy to our staff through in-house meetings and CPD.
- We will comply fully with all relevant legal requirements, codes of practice and regulations.
- We will maintain our Green Travel Plan and strive to achieve year on year improvements.
- We will review and update our policy annually.

Gaynor Taylor, the Practice Manager, is responsible for the Company's Environmental Policy and for the effective implementation, maintenance and annual review of the Environmental management.
